

CAREER PROFILE

I am a highly motivated Civil Engineer with 14 years' experience in a variety of engineering roles. Following my Degree from the University College of Cork my career began in 1998 as a Graduate Engineer with Complete Contract Management. The company is based in Tralee, Co Kerry, Ireland and carrying out work throughout the Munster region. I attained the position of Civil Engineer followed by Senior Civil Engineer with the company and became responsible for the recruiting, training and supervision of Graduate & Civil Engineers as well as organising and running some of the biggest projects in the region.

Major Projects Include: Tralee Institute of Technology, National University of Ireland Galway, Whitegate Oil Refinery Extension, Middleton Main Drainage, Blackrock Clinic Galway, N7 Limerick Bypass and the Tullamore Hospital.

In 2015, I have been working as a Land Surveyor and Engineer for a Property developer in Dublin and a Golf Construction Company in Kerry.

KEY SKILLS AND PERSONAL ATTRIBUTES

- Experienced in the setting out and project management of large scale Civil Engineering projects.
- Responsible for the surveying, co-ordination and site set up of major projects.
- Experienced in the organisation and managing other engineers in a senior engineering position

WORK EXPERIENCE

January 2005 - Present

Company: Paul Casey Civil Engineering Services Ltd

Position: Managing Director/Engineering Manager

Specialised Services include:

Consulting Services	Snag (Punch) lists/Engineers Reports
Project Management	Mortgage Sign offs
Planning Applications	Drainage design
Building Construction Supervision	Percolation Testing
Structural Surveys	Land Registry Maps
Land Surveying	Site Assessments

Classed as a small business my role as Managing Director of 'Paul Casey Civil Engineering Services Ltd' essentially involves the successful achievement of the company objectives (growth, safety, quality, profit and performance) and provide leadership and direction to my staff. As Engineering Manager I personally oversee all projects from conception to completion, liaising with clients, contractors and government bodies throughout the project. I combine the technical aspects of engineering and the organizational, administrative, and planning abilities of management in order to provide a quality product or service.

The company boasts over 150 planning applications within the Munster Region. This involves the design, surveying, setting out and supervising the construction of residential and industrial properties. I have personally met with each client and discussed their needs and explained the local council requirements and restrictions in their area at which time a development plan is established.

Each application is reviewed and approved by me prior to lodging with the Local Council.

Land Surveying and Site Set Outs are a major service provided by the company. I have successfully managed large scale surveys and site set outs which include Spa Glen Housing Development Mallow, Co. Cork, Ballybunion & Dunloe Golfclub and Adventure Centre, Barraduff Housing Scheme, Apartments and Shopping Units Killarney, Co. Kerry.

Major Projects Include:

N7 Limerick Bypass

Surveying monitoring volumes of cut and fill. (Scheme Value €150M)

WK O'Connors and Sons Ltd

WK O'Connors and Sons Ltd are one of the largest housing developers in Munster. We provide full Engineering services for this company on a variety of projects. (Spa Glen Mallow/ Barraduff, Killarney/ Glencairn, Tralee/ Woodlawn, Killarney) (Scheme Value varies).

McCarthy Brothers Ltd

McCarthy Brothers Ltd is one of the largest housing developers in Munster. We provide full Engineering Services for this company on a variety of projects. (Castleconnell Village/ Caherconlish Housing Scheme/ Castletroy Housing, Limerick City) (Scheme Value varies)

Pallas Wind Farm

I came on board this project when they encountered difficulties in setting out. This project entailed an as-built survey of mountainous terrain, re-co-ordination and setting out of roads and wind turbines. I also had to redesign the horizontal curves in order to allow access for the delivery trucks.

Pallas Wind Farm

I came on board this project when they encountered difficulties in setting out. This project entailed an as-built survey of mountainous terrain, re-co-ordination and setting out of roads and wind turbines. I also had to redesign the horizontal curves in order to allow access for the delivery trucks.
